

## Lab 2.2 - NPM Check

When Node.js is installed, the default package manager for Node is also installed.

To check run:

```
npm -v
```

This should output something like the following:

A screenshot of a terminal window titled "1. bash". The prompt is "\$". The user has entered the command "npm -v", and the output is "6.14.4". The prompt "\$" is followed by a cursor bar.

```
1. bash
$ npm -v
6.14.4
$
```

If the first number before the period is 6 or greater, then we are ready to proceed.
